

A friendly old gardener was just passing by.
He said, "Here's a powder for slugs you can try.
It makes them feel funny. They hate it, I've found,
If you sprinkle a tiny bit over the ground.

"The best time to use it is six in the morning.
It'll sort out your problem. But one little warning:
It's **powerful** powder. Don't touch it yourself!
Please keep it safe on a very high shelf."
